PRESS RELEASE

Metals X Clarifies Rover Sale Speculation

Metals X wishes to clarify speculative statements made in the West Australian Newspaper (page 90) on Saturday July 9, 2016 regarding its Rover Gold Project at Tennent Creek in the Northern Territory.

The Rover Project is a longer term copper-gold project and base metal development project for the Company, which Metals X continues to advance toward production and continues to actively explore.

Within the group of gold development projects in Metals X portfolio, Rover is the least advanced and is the only Metals X project requiring a convention new processing plant and virgin mine development. For this reason, it has not been the priority of the Company, but it is by no means a required or desired divestment. However, it does remain material to the gold division's asset base at this stage.

Metals X has received a number of expressions of interest from third parties both directly and through agents. In a prudent manner, rather than deal with these enquiries individually, Metals X has engaged Prime Corporate Finance (PCF) to deal with these in an organised and professional manner. As with all the assets in the Company, the board would consider all firm offers capable of acceptance from third parties and appropriately assess these in the best interest of its shareholders.
